

Keerthika devi Alampalli

Frontend developer

I am a self-driven and committed Web developer with about 2 years of experience in developing Interactive and user-friendly websites, using pixel perfect CSS, semantic HTML, React, JavaScript and Data visualization applications and many other new technologies. I would like to use my creativity and skills in developing innovative and aesthetically appealing web pages. I am open-minded and always thriving to learn new technologies. I am a strong team player and experienced working with people across multiple geographies.

WORK EXPERIENCE

Code Art – (11/2020 – 06/2021)

- Developed a user-friendly and interactive profile management tool that fetches data using React hooks.

Features implemented:

- Data display based on user-defined column selection
- Sort functionality incorporated on any displayed column
- Custom query builder to search on any selected column to fetch and display data
- Developed profile management functionality and functionality to toggle between multiple profiles created by the user easily and seamlessly.

- Responsible for developing static websites using Content Management Systems like Umbraco, Contentful and tools like GraphQL, Gatsby.

- Hands on Razor, Sass and LINQ.

Cyrix.io (09/2019 – 06/2020)

- Responsible for gathering specifications from product development team
- Responsible for developing user friendly and interactive dashboard that illustrates customer journey in a given store in real time primarily using React High Charts.

Features implemented:

- Dashboard that fetches data from the backend.
 - Built various charts and KPIs using React-High Charts.
 - Incorporated date range bar selection to update and display data on the chart according to selection
- Responsible for identification of optimal / suitable tech stack for dash-boarding by evaluating various frontend applications.
- Got hands on debugging remotely on Android using Cordova.
